Projects

Ecommerce SAAS   in progress
Local ecommerce SAAS platform that will help store-owners create their own ecommerce website using WYSIWYG builder.
• The backend is built using Nest.js, PostgreSQL, Redis, Apollo GraphQL.
• The frontend is built using React Native, React Native Web, Redux, and TailwindCSS.

BlogIdeas   blogideas.xyz
A powerful tool that helps bloggers find blog-post ideas analyzing popular search terms.
• Built using Nest.js, Socket.io, React.js, and Redux.
• Used Cheerio and Playwright in order to scrap Google search auto-suggestions and results.

DesignShuffle   designshuffle.xyz
A website builder tool that helps designing templates in minutes.
• A single-page-app built using Webpack, React, Redux, NX, and TailwindCSS.

Professional Experience

Freelance
Full Stack Developer   2014 – Apr 2022
• Finished various projects for my clients and have 100% completion rate.
• Among the projects I've done for my clients were Ecommerce websites, complex CMSs, single-page apps, progressive web apps, mobile apps using React Native.
• The reason why I am searching for a job now is because I want to grow more as a developer and potentially learn new things from others by working in a team.

Education

Aimaqtyq Innovation University   June 2018
Bachelor of Computer Science
